

Off-Grid Lighting Assessment

Côte D'Ivoire

A full transition to energy efficient off-grid lighting would result in the following benefits:

Economic and Energy Benefits

400.6 million USD

annual savings*

6 months

payback period

303 million litres of kerosene,166 million candles and41 million batteries annual savings*

2.2 million barrels of crude oil energy equivalent

Climate Change Mitigation Benefits

Potential Savings:

820.2 thousand tonnes of carbon dioxide emissions reduction annually

Equivalent to:

205.1 thousand mid-size cars off the road

Environmental, Health and Social Benefits

Annual savings of 149.2 USD per household per year

2.5 million households with better quality light

Reduction or elimination of fuel-related health issues, fire hazards and toxic fumes

^{*} National savings estimate shown is based on the average, national end-user price for kerosene. In countries where kerosene is subsidised, the benefit accruing to the nation will be higher.

Off-Grid Lighting Assessment

Country Specific Data and Input Assumptions (2010)

| General Information | | | |
|--|--------------|--|--|
| Total population | 19.7 million | | |
| Off-grid population | 10.4 million | | |
| On-grid, under-serviced population | 2.8 million | | |
| Gross Domestic Product | 23 billion | | |
| Gross Domestic Product per capita | 1,154 USD | | |
| Percent of population on-grid | 47.3% | | |
| Off-grid and under-serviced households | 2.5 million | | |

| Pricing Information (in USD) | | | |
|----------------------------------|------------------|--|--|
| Litre of kerosene | 1.20 - 1.62 | | |
| Candle | 0.10 each | | |
| Kerosene lamp (glass cover) | 8.90 each | | |
| Kerosene lamp (simple wick) | 0.80 each | | |
| Torch (flashlight) | 2.00 each | | |
| Batteries (for torch/flashlight) | 0.50 per battery | | |
| Solar lantern (small) | 18.00 each | | |
| Solar lantern (large) | 35.00 each | | |

| Average Daily Operating Hours | | |
|--|---------------|--|
| Off-grid and under-serviced households | 3.6 hours/day | |
| Off-grid and under-serviced small business | 4.0 hours/day | |

| Installed Stock Estimates* (millions) | | |
|---------------------------------------|-------------|-------------|
| Light source | Households | Businesses |
| Kerosene lamp (glass cover) | 5.1 (59.8%) | 0.5 (68.6%) |
| Kerosene lamp (simple wick) | 2.3 (26.8%) | 0.0 (5.7%) |
| Torch (flashlight) | 0.8 (8.9%) | 0.1 (11.4%) |
| Candles (light points) | 0.4 (4.5%) | 0.1 (14.3%) |
| Total: | 8.6 million | 0.7 million |

| Average Household Monthly Consumption* | | | |
|--|---------------|-----------|--|
| Light energy source | Units | Cost | |
| Kerosene | 9.5 litres | 11.38 USD | |
| Candles | 4.3 candles | 0.43 USD | |
| Batteries | 1.2 batteries | 0.61 USD | |
| Total: | | 12.42 USD | |

| Simple Payback Periods [*] | | | |
|-------------------------------------|------------|------------|--|
| Sectors evaluated | Households | Businesses | |
| Kerosene lamp (glass cover) | 0.6 years | 0.5 years | |
| Kerosene lamp (simple wick) | 0.4 years | 0.4 years | |
| Torch (flashlight) | 0.7 years | 0.7 years | |
| Candles | 0.5 years | 0.5 years | |
| Weighted national average: | 0.5 years | 0.5 years | |

^{*} Includes on-grid, under-serviced households and businesses, if applicable
